Acknowledgements

Technology Integration in Chemistry Education and Research (TICER) is inspired by the works of teachers and professors who are always willing to do whatever it takes to reach out to their students. These professionals care enough to adopt and implement new teaching tools and technologies and to reform their teaching practice to better prepare the next generation of students for the global challenges through technology-enhanced chemistry education. TICER is an effort to bring together the teachers and researchers to make chemistry classrooms more engaging and up-to-date to the learning styles of generation Z-students. This book is dedicated to the contributing authors and several other professionals in chemistry and science education.

I would also like to thank my colleagues at Department of Chemistry and Biochemistry at South Dakota State University (SDSU), who have provided their unconditional support during my work on TICER. Dr. Douglas Raynie, who is department head for chemistry & biochemistry at SDSU, has been very patient in listening to my ideas and encouraging me to pursue them. I would also like to thank Ms. Stephanie Jensen, Ms. Tonya Hohenthaner (program assistants), and Mrs. Jaque Mann (department safety, technology, and facilities manager). They often step up to the plate for little and big needs of this TICER editor and contributor.

Further many thanks to my colleague and co-editor Dr. Robert Belford for working with me on this ACS symposium series. This book will be incomplete without my sincere acknowledgement to the ACS publications team for their monumental patience and all their support in this journey. Special thanks to Amanda Koenig, Lake Lloyd, and Kayci Wyatt for their timely help with the editorial process. Last but not least, my deepest thanks to my family – my husband and my daughter who are my life pillars. It is a blessing to have an opportunity to work with several wonderful people for this ACS book themed on technology integration.

The editors and ACS publications acknowledges the following reviewers for their contributions to the TICER symposium series:

- Resa Kelly, Department of Chemistry, San Jose State University
- Bradley Fahlman, Department of Chemistry and Biochemistry, Central Michigan University
- Lyniesha Wright, Department of Chemistry, North Carolina State University
- Julia Winter, Alchemie Solutions Inc.
- Sunil Malapati, Department of Chemistry, Clarke University
- Laura Parmentier, Department of Chemistry, Beloit College
- Robert LeSuer, Department of Chemistry and Biochemistry, The College at Brockport
- Deborah Bromfield Lee, Department of Chemistry, Biochemistry, & Physics, Florida Southern College
- Michelle Richards-Babb, Department of Chemistry, West Virginia State University
- Stephen Leonard, Department of Natural Sciences, Indiana Wesleyan University
- Amelia Fuller, Department of Chemistry and Biochemistry, Santa Clara University
- Patrick Martino, Department of Chemistry, Bucknell University
Kevin Fogarty, Department of Chemistry, High Point University
Fun Man Fung, Department of Chemistry, National University of Singapore
Brittland DeKorver, Department of Chemistry, Grand Valley State University
Jayashree Ranga, Department of Chemistry and Physics, Salem State University
Oluwatobi Odeeye, Department of Chemistry & Biochemistry, The University of Oklahoma
Scott Tremain, Department of Chemistry, University of Cincinnati, Blue Ash
Kate Ries, Natural Sciences Department, Metropolitan State University
Esperanza Zenon, Physical Science, River Parishes Community College
Micah Shippee, Liverpool CSD
Jack Eichler, Department of Chemistry, University of California, Riverside
Jeremy Klosterman, Department of Chemistry and Biochemistry, University of California, San Diego
Jaclyn Stewart, Department of Chemistry, University of British Columbia
Nancy Ruzycki, Department of Materials Science and Engineering, University of Florida
James Nyachwaya, Department of Chemistry and Biochemistry, North Dakota State University
Racquel DiCicco, Department of Chemistry and Physics, Wagner College
