General Chemical's supply network is built around your needs for HF

General Chemical's multiple production facilities for anhydrous and aqueous Hydrofluoric Acid make us the only supplier to offer shipment from more than one plant! Our plants are located at Baton Rouge, La.; Marcus Hook, Pa.; and Nitro, W. Va. Deliveries of aqueous acid are also made from five strategically-located bulk storage plants in Buffalo, Chicago, Cleveland, El Segundo (California), and Pittsburgh.

This smoothly-coordinated production and delivery system is backed by a long lifeline of raw material sources: fluorspar reserves, mines, mills, and large sulfuric acid capacity.

Call or write your nearest General Chemical office for information, prices, delivery. Make General Chemical your HQ for HF!
