need a fast draw on MgO?

don't worry...
you can get the drop
on your problems

Michigan Chemical increased magnesia production over 30% in 1967. And further expansion is in progress. We reassure you of a continuing supply of the widest range of magnesia products in the industry.

If existing products aren’t the answer for you, we can draw an accurate bead on reactivity, assay, high purity, particle size, dispersibility, packaging, or any of your special requirements.

Michigan Chemical’s 25 years’ experience in manufacturing standard and specialty magnesia products is at your service.

Try drawing on us.
