Acrylates.
We’re getting bigger
to serve you better.

The addition of our new acrylate-producing plant makes Celanese the largest merchant supplier of the broadest line of highest quality acrylate esters in the world.

This means that if you manufacture textile resins, adhesives or coatings—Celanese has the acrylates you need, in the quantities you need, when you need them.

This supply includes ethyl acrylate, normal butyl acrylate, 2-ethylhexyl acrylate, glacial acrylic acid, methyl acrylate and multi-functional acrylates—along with the co-monomer vinyl acetate.

But, there’s more to the Celanese source than supply alone. There always is. In this case there’s more immediate availability from our network of terminals across the country. With shipments in tank cars, compartmented tank cars or drums according to your need. All of it accompanied by the latest technical expertise and service.

To ask for further information just write to: Celanese Chemical Company, Dept. 2038, 1211 Avenue of the Americas, New York, New York 10036.

Celanese...there’s no substitute for experience.
